

maxiCHECKIN

PATIENT SELF CHECK-IN KIOSK

MaxiCheckin

With MaxiCheckin, patients can check themselves in when they arrive at your office and take a seat! Your patient's no longer have to stand and wait especially if the receptionist is dealing with another patient.

How it Works

With an intuitive interface and easy-to-use touch screen display, the MaxiCheckin kiosk in your reception area allows patients to check themselves in for their appointment.

- » When the self check-in is complete, the appointment status in your Maxident scheduler automatically updates itself to "arrived", and is viewable from any computer in the office with access to the scheduler.
- » The clinician, who is waiting for their next patient to arrive, can see that the patient is checked in and can start treating the patient immediately, keeping you on time.

Having MaxiCheckin is like having another receptionist but without the extra salary!
